Key Responsibilities:

1. Sales Strategy & Execution:

- Develop and implement a comprehensive sales strategy to achieve and exceed Cloudmon's sales targets in India.
- Identify market opportunities and design strategic initiatives to capture market share and increase brand visibility.

2. Leadership & Team Development:

- Lead, mentor, and manage a team of Senior Business Development Managers across multiple cities in India.
- Foster a high-performance sales culture focused on accountability, results, and professional development.

3. Market Expansion & Channel Management:

- Build and expand a network of channels and strategic partnerships to increase Cloudmon's market reach.
- Engage with key stakeholders in large enterprises to drive sales opportunities and partnerships.

4. Client Engagement & Relationship Management:

- Cultivate and maintain strong relationships with C-level executives and key decision-makers in target industries.
- Ensure a deep understanding of client needs and challenges, providing tailored solutions that demonstrate the value of Cloudmon's offerings.

5. Collaboration & Cross-Functional Coordination:

- Work closely with the product, marketing, and technical teams to align sales strategies with

product offerings and market demand.

- Coordinate with the implementation and support teams to ensure seamless client onboarding and satisfaction.

6. Sales Operations & Reporting:

- Oversee the sales pipeline, ensuring accurate forecasting and timely reporting of sales activities and performance metrics.
- Utilize CRM tools to maintain comprehensive records of sales activities, opportunities, and outcomes.

7. Market Intelligence & Competitive Analysis:

- Stay abreast of industry trends, competitor activities, and advancements in IT monitoring and observability solutions.
- Provide insights and feedback to the product and marketing teams to enhance Cloudmon's market positioning.

8. Revenue & Profitability Management:

- Drive revenue growth while managing costs to achieve optimal profitability.
- Develop pricing strategies and sales incentives to motivate the sales team and attract high-value clients.

Qualifications:

1. Experience:

- 15-20 years of experience in enterprise sales, with a proven track record of success in the infrastructure products, IT monitoring, and unified observability solutions sectors.
- Demonstrated success in leading and scaling sales teams, with experience managing senior sales professionals.

2. Industry Knowledge:

- Deep understanding of the IT monitoring landscape, with experience selling to large enterprises in industries such as HP, IBM, DELL, ManageEngine, or similar.
- Strong technical acumen and the ability to articulate complex solutions to both technical and non-technical audiences.

3. Leadership & Management:

- Exceptional leadership and team management skills, with the ability to inspire and drive a high-performance sales team.
- Self-driven, with an uncompromising attitude towards achieving and exceeding targets.
- Ability to promote integration and togetherness within the team, fostering a collaborative work environment.

4. Communication & Negotiation:

- Excellent communication, presentation, and negotiation skills, with a track record of closing

complex, high-value deals.

- Strong interpersonal skills and the ability to build and maintain relationships with C-level executives.

5. **Education:**

- Bachelor's degree in Business, Technology, or a related field is required. An MBA or advanced degree is preferred.

Compensation And Benefits:

1. **Salary:** Industry-competitive with a substantial performance-based incentive structure.
2. **Benefits:** Comprehensive benefits package including health insurance, and other perks.
3. **Career Growth:** Clear pathways to senior leadership roles within the organization, with opportunities to shape the future of Cloudmon in India and beyond.

What We Offer:

1. **Leadership Opportunity:** Be at the forefront of driving Cloudmon's growth in a dynamic and evolving market.
2. **Professional Development:** Continuous opportunities for learning and career advancement within a fast-growing company.
3. **Innovative Environment:** Work with cutting-edge technology and a talented team dedicated to pushing the boundaries of IT observability.
4. **Market Influence:** Play a key role in shaping the future of unified observability in India and across global markets.

Marketing & Communication

Visual Design Expert

Location: Dubai, Onsite

Type: Full-Time

Experience Required: 5-8 Years

About Us:

Veryx Technologies Is A Leading Provider Of Innovative Solutions In The Fields Of Infrastructure, Networks, Application And Security Monitoring, And Unified Observability. We Are Committed To Delivering Cutting-Edge Technology That Helps Businesses Achieve Their Digital Transformation Goals. We Are Looking For A Highly Skilled And Creative Visual Design Expert To Join Our Team.

Job Summary:

The Ideal Candidate Will Have A Strong Background In Visual Communications And Graphic Design, With Extensive Hands-On Experience In Both Digital And Print Creative Work. You Will Play A Crucial Role In Crafting Visually Compelling Designs That Align With Our Brand's Identity And Resonate With Our Target Audience Across Various Platforms.

Key Responsibilities:

Creative Design:

- Develop and execute innovative design concepts for digital and print media, including websites,

- social media campaigns, marketing materials, brochures, posters, and other promotional assets.
- Translate complex ideas into visually appealing and easy-to-understand designs.
- Collaborate with marketing, content, and product teams to ensure visual consistency across all channels.

Digital Design:

- Create and optimize visual content for websites, social media, email campaigns, and digital advertisements.
- Design user interfaces (UI) for web and mobile applications with a focus on user experience (UX) and aesthetic appeal.
- Stay updated with the latest digital design trends, tools, and technologies.

Print Design:

- Design and layout printed materials such as brochures, flyers, banners, and packaging.
- Ensure print quality and color accuracy by working closely with printers and other production teams.
- Understand and apply the principles of typography, composition, and visual hierarchy to print designs.

Branding:

- Contribute to the development and maintenance of the brand's visual identity, ensuring consistency across all visual elements.
- Create brand guidelines and ensure they are adhered to in all design projects.

Project Management:

- Manage multiple design projects simultaneously, from concept to completion, ensuring timely delivery.
- Communicate effectively with stakeholders to understand project requirements and provide design solutions that meet objectives.
- Provide input and guidance during the conceptualization stage of projects, contributing to brainstorming and ideation sessions.

Qualifications:

Educational Background:

- Bachelor's degree in Visual Communications, Graphic Design, or a related field.

Experience:

- 5-8 years of professional experience in visual design, with a strong portfolio showcasing both digital and print design work.

Technical Skills:

- Proficiency in Adobe Creative Suite (Photoshop, Illustrator, InDesign, etc.), Sketch, Figma, or other relevant design software.
- Understanding of web design principles, including responsive design, HTML/CSS basics, and UX/UI best practices.
- Knowledge of print production processes and requirements.

Creative Skills:

- Strong sense of aesthetics, including color theory, typography, and visual composition.
- Ability to translate brand values and messaging into visual designs that engage and inspire.
- Detail-oriented with a passion for producing high-quality work.

Soft Skills:

- Excellent communication and presentation skills.
- Ability to work collaboratively in a team environment and take feedback constructively.
- Strong organizational and time management skills with the ability to manage multiple projects under tight deadlines.

Preferred Qualifications:

- Experience with motion graphics, video editing, or animation.
- Familiarity with digital marketing concepts and strategies.
- Experience working in a fast-paced environment, such as an agency or in-house creative team.

Why Join Us?

- Translate complex technical concepts related to infrastructure, networks, application, and security monitoring into clear, concise, and engaging content.
- Leverage an analyst background to provide in-depth insights and analysis within content, offering value to readers.
- Collaborate with subject matter experts to gather technical information and ensure accuracy in content.

Content Strategy & Planning:

- Plan and design content strategies that align with the company's marketing goals and objectives.

- Develop content calendars and manage the end-to-end content creation process, ensuring timely delivery of content.
- Identify content gaps and opportunities to enhance the company's online presence and lead generation efforts.

Campaign Design & Execution:

- Design and roll out content-driven marketing campaigns, including email campaigns, social media content, and landing pages.
- Work closely with the marketing team to ensure content is integrated into broader marketing initiatives and campaigns.
- Monitor and analyze the performance of content and campaigns, making data-driven adjustments to improve effectiveness.

Seo & Content Optimization:

- Implement SEO best practices to optimize content for search engines and improve organic traffic.
- Continuously improve and refine content based on keyword research and SEO trends.

Collaboration & Coordination:

- Collaborate with designers, product managers, and other stakeholders to ensure content is visually appealing and aligns with the company's branding.
- Coordinate with external agencies and freelancers as needed for content production and design.

Brand Voice & Consistency:

- Ensure all content maintains a consistent brand voice, tone, and style across all platforms.
- Uphold high editorial standards and ensure all content is error-free and meets company guidelines.

Qualifications:

Education:

- Bachelor's degree in Marketing, Communications, Journalism, Technical Writing, or a related field. A background in computer science, engineering, or a technical discipline is a plus.

Experience:

- 3-5 years of experience in content writing, with a preference for candidates who have an analyst content writing background, particularly in the tech industry.
- Proven experience in planning and executing content-driven marketing campaigns.

Technical Knowledge:

- Strong understanding of infrastructure, networks, application, and security monitoring.
- Familiarity with unified observability concepts and related technologies.

Skills:

- Exceptional writing and editing skills with a strong command of the English language.
- Ability to translate complex technical information into clear, concise, and engaging content.
- Proficiency in SEO principles and content optimization techniques.
- Strong analytical skills to incorporate insights and analysis into content.
- Strong project management skills with the ability to handle multiple projects simultaneously.
- Creative thinker with the ability to design and orchestrate compelling marketing campaigns.
- Excellent collaboration and communication skills.

Benefits:

- Competitive salary and benefits package
- Opportunity to work with cutting-edge technology and industry experts
- Career growth and development opportunities
- Collaborative and inclusive work environment

- DPDK, L2/L3 switch or Linux Ethernet driver experience.
- Good debugging skills
- Familiarity with debugging tools like GDB

Secondary Skills:

Work Experience With

- Packet processing
- QoS
- TCP protocol
- ITU or IETF standards.
- Tools such as GIT, Valgrind

Educational Qualification:

B.e – Ece, It, Computer Science / B.sc – Maths, Computer Science & Mca

Business Analyst: 5+ Years Of Experience

As A Business Analyst In Our Observability Platform Team, You Will Play A Key Role In Shaping The Future Of Our Product. You Will Be Responsible For Understanding And Documenting The Requirements For Our Observability Platform, Ensuring They Align With The Product Roadmap And Overall Business

Strategy. Your Insights And Analysis Will Be Crucial In Guiding The Development Of A Platform That Meets Both Current And Future Market Needs.

Responsibilities:

- Requirement Gathering and Documentation - Collaborate with the Senior Observability Platform Specialist to understand the product vision and roadmap. Conduct interviews, workshops, and surveys with stakeholders to gather detailed business requirements. Translate these requirements into well-organized and clear documentation, including use cases, user stories, and acceptance criteria.
- Market and User Research - Perform market research to understand industry trends, competitor offerings, and customer needs related to observability platforms. Analyze user feedback and usage data to identify areas for product improvement and new feature development.
- Stakeholder Collaboration - Work closely with the product management team to ensure requirements align with the overall product strategy. Facilitate communication between technical teams and non-technical stakeholders to ensure a mutual understanding of product requirements and priorities.
- Requirement Validation and Prioritization - Validate gathered requirements with stakeholders, refining and adjusting as necessary. Assist in prioritizing requirements based on business value, technical feasibility, and alignment with the product roadmap.
- Supporting Product Development - Provide ongoing support to the development team by clarifying requirements and making informed decisions on requirement changes. Participate in Agile ceremonies such as sprint planning, retrospectives, and stand-ups to provide input and feedback.
- Analysis and Reporting - Continuously analyze the performance of the platform against set goals and KPIs. Prepare and present reports on findings, progress, and recommendations to senior management and other stakeholders.

Required Skills:

- Significant expertise with observability software like SolarWinds, ManageEngine, Zabbix, Site24x7, and related platforms.
- Demonstrated experience in design and deploying SolarWinds, ManageEngine, and/or Site24x7 at least 5 times.
- Proven ability to implement, set up, and enhance medium to large systems using these tools, whether building from scratch or transitioning from one platform to another.
- Comprehensive understanding of Cloud technologies (AWS, Azure, & GCP), Networking principles and enterprise IT infrastructure.
- Excellent communication skills to effectively document and communicate product requirements

to stakeholders and teams members.

- Proven experience as a Business Analyst, preferably in technology or software development.
- Strong understanding of observability platforms and the software development lifecycle.
- Excellent analytical, problem-solving, and documentation skills.
- Effective communication and interpersonal skills.
- Familiarity with Agile methodologies and tools like JIRA and Confluence.
- Ability to work in a fast-paced and dynamic environment.

Educational Qualification:

- Bachelor's degree in Business Administration, Information Technology, or a related field.

Business Analysis Lead: 10+ Years Experience

As A Senior Observability Platform Specialist, You Will Play A Crucial Role In Advancing Our Company's Observability Platform. Your Primary Responsibility Will Be To Leverage Your Extensive Experience In Various Observability Platform Implementations To Keep Our Product At The Forefront Of The Industry. You Will Act As A Bridge Between The Technical And Business Realms, Ensuring That Our Platform Not Only Meets Current Market Standards But Also Sets New Benchmarks For Innovation And Functionality.

Responsibilities:

- Market Analysis and Competitive Research - Conduct in-depth research to stay abreast of the latest trends and advancements in observability platforms. Perform detailed comparisons of competing products to identify strengths, weaknesses, and market gaps. Regularly present findings to the team, highlighting potential areas for innovation and improvement in our product.
- Requirement Gathering and Analysis - Work closely with the product management team to translate market research into concrete business and functional requirements. Organize and lead brainstorming sessions to generate new ideas and approaches for product enhancement. Develop clear, detailed documentation of required features and functionalities.
- Collaboration and Strategy Formulation - Collaborate with senior management to align product development strategies with company objectives. Actively participate in strategic planning sessions, offering insights from a market and technical perspective.
- Product Development and Enhancement - Lead the initiative to fill gaps in our current product offerings based on market research and competitive analysis. Guide the technical team in the design and development of new features and functionalities. Ensure that product enhancements are executed within the set timelines and meet quality standards.

- Stakeholder Engagement and Communication - Maintain constant communication with the product manager and other stakeholders to align on priorities and delivery schedules. Present regular updates to senior management on progress, challenges, and milestones.
- Team Leadership and Mentorship - Provide mentorship and guidance to team members working on observability platform projects. Foster a culture of innovation and continuous improvement within the team.

Required Skills:

- Significant expertise with observability software such as SolarWinds, ManageEngine, Zabbix, Site24x7, or similar platforms.
- Demonstrated experience in design and deployment of at least 10 client implementations of such observability software.
- Proven ability to implement, set up, and enhance medium to large systems using these tools, whether building from scratch or transitioning from one platform to another.
- Comprehensive understanding of Cloud technologies (AWS, Azure, & GCP), Networking principles and enterprise IT infrastructure.
- Strong understanding of market trends, customer needs, and competitive landscape in the observability tools and monitoring solutions space.
- Ability to define and prioritize product features based on customer feedback, data analysis, and industry best practices.
- Experience working with cross-functional teams including engineering, design, marketing, and sales to drive product development and go-to-market strategies.
- Proficiency in creating product roadmaps, user stories, and specifications for development teams.
- Excellent analytical and problem-solving skills, with the ability to make data-driven decisions and iterate on product features based on feedback and metrics.
- Strong leadership and communication skills to effectively communicate product vision, goals, and updates to stakeholders and teams.
- Experience in driving product adoption, user engagement, and customer success initiatives.
- A passion for technology and a keen interest in staying updated with the latest advancements in observability, monitoring, and cloud technologies.

Educational Qualification:

- Bachelor's degree in Business Administration, Information Technology, or a related field.

Professional Services

Telco Transformation

Sdn Developer : 2 To 6 Years Of Experience

We Are Looking For Sdn Developers Who Can Contribute To Telco Sdn-Based Projects Involving Areas Such As Intent-Based Provisioning And Closed-Loop Automation For Service Lifecycle Orchestration, Service Provisioning And Service Assurance.

Mandatory Skills

- Experience in Python and Java scripting languages
- Working experience in development of BluePlanet service templates and resource adapters
- Experience in VM/container orchestration - Dockers and Kubernetes
- Good knowledge in DevOps tools and Agile methodology
- Knowledge about networking applications and inventory system

Desirable Skills

- Knowledge in networking and with networking equipment

Educational Qualification:

- BE/B.Tech, MCA, MSc – IT

Mobile Technologies - 5G Core And Ran

Protocol Software (Lte/5G Development) : 1 To 5 Years Of Experience

We are looking for enthusiastic telecommunication professionals who can contribute for large scale 5G software development efforts based on Open-RAN for a globally leading mobile wireless company.

Responsibilities Include But Not Limited To

- Planning, estimation and enhancement of xApps based on O-RAN

- Guiding team members for development
- Reviewing the team members work.

Mandatory Skills:

- Experience in C, C++ programming
- Experience in eNodeB/gNodeB software development, validation, maintenance and lifecycle
- Detailed understanding of 3GPP specifications
- Expertise in PDCP, RRC, GTP protocols
- Experience in container/micro-services development
- Deep insight of Unix like operating systems
- Familiarity with 4G-LTE/5G

Educational Qualification:

- Bachelors or Masters in Engineering (B.E/B.Tech or M.E/M.Tech) in Computer science or Electronics and Communication

[Apply Now](#)

4G/ Lte/ 5G Testing Engineers : 3 To 8 Years Of Experience

We Are Looking For Enthusiastic Telecommunication Professionals Who Can Contribute For Large Scale 5G Software Development Efforts Based On Open-Ran For A Globally Leading Mobile Wireless Company.

Responsibilities:

- Development of test strategy and test plans

Mandatory Skills:

- Experience in protocols like RRC, MAC, PDCP, RLC, SDAP, eCPRI etc.
- Experience in eNodeB testing
- Experience in 4G/ 5G call processing testing
- Knowledge in use of Vector Signal Analyser and Vector Signal Generator
- Experience in Fronthaul testing for performance testing, conformance testing, interoperability testing, automated testing.

Secondary Skills:

- Exposure to protocol such as E1AP, F1AP, NGAP, XnAP

- Knowledge of 5G protocols.

Educational Qualification:

- Bachelors or Masters in Engineering (B.E/B.Tech or M.E/M.Tech) in Computer science or Electronics and Communication

Ip Networking - Development

Protocol Developers : 1 To 5 Years Of Experience

We are looking for dedicated and talented Network Protocol stack developers for developing firmware for a Layer 2/ Layer 3 Switch. Strong L2 switching and routing protocols is a must.

Mandatory Skills:

- Experience in C Programming
- Linux/Unix system calls
- State Machine implementation
- Multithreading, memory management
- IPC: shared memory, message queues
- SNMP protocol, SNMP commands, Traps
- Have worked on Layer 2 or Layer 3 protocols such as RSTP, VLAN and OSPF
- Knowledge of tools: gdb, Cunit, Coverity, Gcov, Gprof, Valgrind, Net-SNMP

Educational Qualification:

- BE/B.Tech, ME/M.Tech, MCA, MSc – IT

Cyber Security

Security Analyst : 4 To 6 Years Of Experience

We are looking for candidate who can perform the following:

- Perform Penetration and Vulnerability Test

- Perform Security assessment
- Perform automation test
- Recognize and safely utilize attacker tools, tactics, and procedures
- Develop scripts, tools, or methodologies

Required Skills And Experience:

- Good Knowledge and Experience working in Python
- Experience in powershell scripts in Windows
- Experience in bashshell in Linux
- Experience in performing penetration and vulnerability application test.

Desirable Skills:

- Knowledge of Caldera tools

The Ideal Candidate Should:

- Be confident & assertive with high energy levels.
- Be technical independent with good problem solving & analytical skills
- Have Good verbal and written communications skills

Educational Qualifications:

- BE/B.Tech, MCA, MSc – IT

Cloud And Multi-Cloud

Senior Cloud & Devops Engineers: 4 To 6 Years Of Experience

We Are Looking For Devops Engineers Who Can Develop Automation For Cloud Environments.

Required Skills:

- Experience in one or more public cloud environments AWS, Azure, Google Cloud
- Kubernetes, cloud Networking, Security & Storage, Docker, Helm
- Opensource cloud & on-premises technologies
- Familiarity with ONAP orchestration and automation will be an advantage.
- Linux & scripting

Educational Qualifications:

B.e / B.tech, Mca, Msc – It
