Careers

At Veryx, attracting, developing and sustaining the best talent has always been an area of focus. We give talented and innovative individuals the chance to explore varied career paths in a challenging and rewarding environment. We believe that our people are our greatest asset and our biggest competitive advantage.

When You Work At Veryx, Here's What You Can Look Forward To:

- We work on very stimulating projects. What drives business today is technology and we are the facilitating arm for some of the worlds most recognized brands. Whether it is cloud, networking, analytics, or security – you will be at the forefront of changing and shaping the market.
- With more experience than a startup, yet far away from the red tape of traditional organizations, we have a transformational approach at work and focus on building leaders, as you are trained to be empowered in decision making.

WE ARE
GREAT PLACE TO WORK - CERTIFIED™

Building and sustaining High-Trust, High-Performance Culture™

Great Place To Work®
Certified
SEPT 2022 – SEPT 2023
INDIA

"Each Day At Work Is Challenging, Motivating, Fulfilling And Lots Of Fun. I Like It Here!"
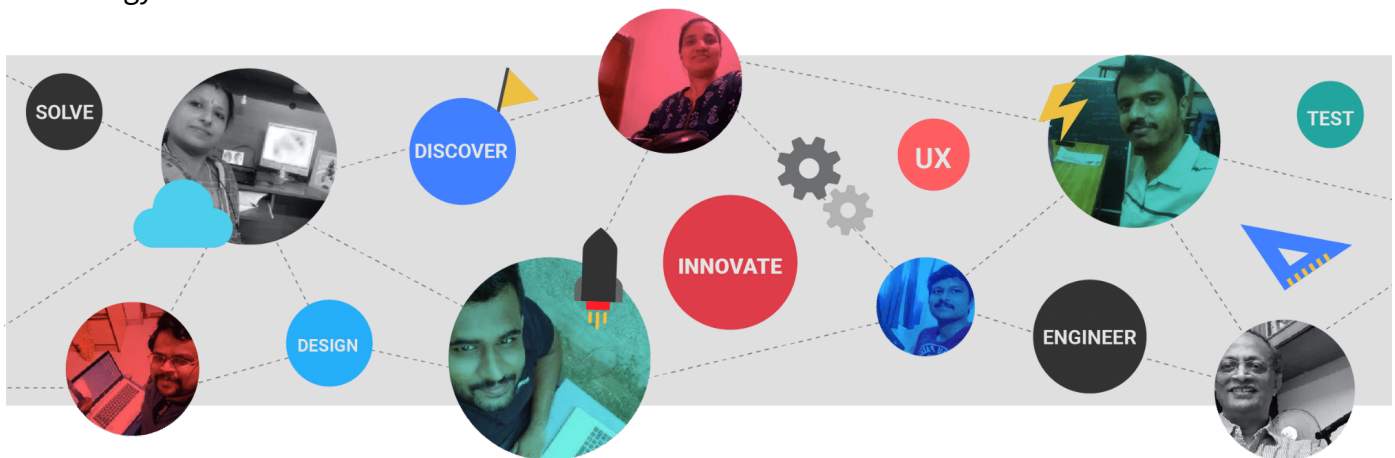

Our employees are catalysts who make a difference to our clients, our company and the community!

"I'm Learning And Implementing Technology That Is Setting Global Benchmarks"

Our customers are highly appreciative of Veryxians for their commitment and talent.

" I Am Impressed By The Environment And I Have Been Treated Like A Family Member."

We look for people who can partner with us and mutually grow and travel with us in our journey to technology transformations!

Products

Mean Stack Developer : 4 To 6 Years Of Experience

We are looking for MEAN stack developers who can collaborate well with engineers and data implementation specialists to design and create advanced, elegant, and efficient systems. Responsibilities include:

- Defining code architecture to support a high-performance and scalable product with a minimal

footprint.

- Collecting & building data from multiple systems like Linux, Windows and network devices via SNMP and agents.
- RESTfully abstracting data to the UI build on Angular through a Node.js backend
- Addressing technical issues

Required Skills:

- In-depth knowledge of NodeJS, ExpressJS
- Experience implementing applications using Angular 8+
- Experience creating front end applications using HTML5, Angular, SASS
- Hands-on experience with JavaScript/Typescript Development on both client and server-side
- Experience with modern frameworks and design patterns, minimum one-year experience with MEAN Fullstack paradigm

Desirable Skills:

- Web Development Experience for High-Traffic, Public Facing web applications
- Experience in creating custom dashboards
- Experience with cloud technologies
- Creating secure RESTful-based web services in XML and JSON, Javascript
- Continuous integration and version control (SVN, Git)

Educational Qualification:

B.e / B.tech, Mca,Msc - It

Apply Now

Linux & C Based Developer : 2 To 5 Years Of Experience

We are looking for software development engineers with good skills in C based development in Linux.

Primary Skills:

- Very good in Linux C programming
- Basics of IP/Layer-3 Networking
- DPDK, L2/L3 switch or Linux Ethernet driver experience.
- Good debugging skills
- Familiarity with debugging tools like GDB

Secondary Skills:

Work Experience With

- Packet processing
- QoS
- TCP protocol
- ITU or IETF standards.
- Tools such as GIT, Valgrind

Educational Qualification:

B.e – Ece, It, Computer Science / B.sc – Maths, Computer Science & Mca

Apply Now

Elastic Search : 3-5 Overall, 2+ Year Experience In Elastic Search

As a member of the Data Analytics Practice, the candidate will be responsible for:

- Quickly creating and optimizing a wide variety of services.
- Creating customized policies and virtualization and security services.
- Gathering real time network intelligence with integral virtual probe and analytics.

The Candidate Will Help Build A Best Of Breed Platform For Developing High Performance Applications. Responsibilities Will Include Integrating, Enhancing And Contributing To Leading Open Source Projects Such As Elasticsearch, Logstash, Kibana With A Particular Focus On Elk Based Logging Platform.

Required Skills And Experience:

General:

- Must have experience on application development using any stack
- Experience in Web/Application development.
- Expertise in at least one of these languages: Python, Javascript, Node.Js, Shell Scirpting
- Experience of one of the Database – Oracle, MySQL or PostgreSQL
- Familiar with Linux, Experience in CICD for in-house and cloud based implementations

Search:

- Expertise in Elastic stack (ElasticSearch, logstach, Kibana, Beats, APM) – Mandatory
- Expertise in ElasticSearch, Cluster, Sharding, Index and Mapping Design
- Good understanding and hands-on experience on Relevancy Strategies
- Understanding about 'keyword search'

- Understanding on Search platform eco-system Data Connectors, Data Transformation, Data Load, Data Index, Data Query Clients, Data
- Results Relevancy Modules
- Experience in customizing search workflows that includes faceted search, keywords search, phrase search, query expansion using synonyms
- Experience in search results tuning by optimizing query load, offline sorting, shard based search

Desirable Skills:

Knowledge Of Databases, Linux & Experience In Linux Scripting

Educational Qualifications:

- BE/B.Tech, MCA, MSc – IT

Apply Now

Product Manager : 5+ Years Of Experience

The Product manager will be responsible for planning and execution throughout the lifecycle of Veryx products, including – gathering and prioritizing product and customer requirements, defining the product vision, and working closely with engineering, sales, marketing and support to ensure revenue and customer satisfaction goals are met.

- Define the product strategy and roadmap
- Deliver MRDs and PRDs with prioritized features and corresponding justification
- Develop relevant marketing collaterals, blogs, sales and channel training
- Work with external third parties to assess partnerships and licensing opportunities
- Run beta and pilot programs with early-stage products and samples
- Be an expert with respect to the market and competition

Skills:

- BE/ME with minimum 2 years of similar experience. Overall 5 to 8 years industry experience. MBA will be an added advantage.
- Experience in networking products and SaaS based products will be an advantage
- Excellent written and verbal communication skills
- Excellent teamwork skills
- Proven ability to influence cross-functional teams without formal authority

Apply Now

Product Engineering Leader : 8 To 12 Years Of Experience

We are looking for Project Engineering Leaders who will build and deliver world-class products

- Work with Product Management function to fulfill product roadmaps, develop collaterals and support marketing and customer facing efforts
- Understand the market/customer context, build detailed requirements that align product to customer needs
- Define phased, iterative execution of requirements, and collaboratively work in an Agile environment.
- Maintain deep knowledge, context, & ownership of the features/components worked on.
- Create collaborative environment where teams care about the product they are creating, how they create it, and the impact it has on customers' business objectives.
- Passionately work closely with UX Design function to ensure superior customer experience.
- Possess strong analytical skills and the ability to quickly ramp up in new technologies in a client facing environment.
- Perform estimation and scheduling for engineering team efforts
- Lead team(s) of engineers in development, maintenance and L3 support

Technical Skills:
Mandatory:

- NodeJS, ExpressJS or Restify, Angular 2+, HTML5, Angular
- Experience with modern frameworks and design patterns, experience with MEAN Fullstack paradigm
- Elastic Search or MongoDB

Optional : Cyber Security, Application Performance Monitoring, Aiops, Ml

[Apply Now](#)

Technical Lead: 4 To 8 Years Of Experience

We are seeking an enthusiastic candidate who is technical strong and able to lead a team and familiar with agile methodologies.
Responsibilities:

- Preparation of test design, strategy specifications, feature & product test specifications, test cases, review, and updates
- Conducting sprint rituals like planning, review, retro and stand ups

- Testing and develop test cases to cover various scenarios
- Develop automated feature test cases using internal test automation framework
- Develop standalone or emulation scripts for testing
- Track and fix for the FRs reported on the automated scripts in release cycle
- Provide timely reports

Required Skills And Experience:

- Experience in testing L2/L3 switches and routers
- Experienced in black box, white box testing and E2E testing experience.
- Test domain Skills – Strong knowledge of foundation concepts – L2/L3 domain
- Knowledge and usage of test equipment and traffic generators
- Scripting/Automation Skills – Perl, Python, TCL, Shell
- Networking knowledge, Strong L2 / Protocols knowledge (CFM, SOAM, ERPS, RSTP, MSTP, Carrier Ethernet, RIP, OSPF, BGP, IPv6)
- SNMP knowledge
- Agile and continuous Delivery methodologies – Jira / MS Planner
- Software Configuration Management – GitLab
- Good Communication skills

Educational Qualifications:
B.e / B.tech, Mca, Msc – It

Junior Technical Support Analyst : 1 To 3 Years Of Experience

The Position Is For A L1 – Support Engineer, Who Will Be Responsible For Providing High-Quality Technical Support Of Veryx Products To Customers Globally. The Job Involves Handling And Resolving Complex Technical And Functional Queries From Customers. Candidates With Relevant Experience In L1 Technical Customer Support (Voice And Email), With A Strong Customer Interaction Experience Will Be Preferred.
Candidate Should Be Willing To Work In A Flexible Time Zone And Provide Weekend Coverage, If Needed.

Responsibilities

- Ticket registration, attend to customer phone calls & chat messages
- Respond to user emails and social media messages if any
- Provide product information and basic demo of the product
- Collect customer requests and data

- Conduct basic troubleshooting using questionnaires to find out the level of support needed
- Create tickets for Level 2 support, coordinate with customer and internal team and bring the ticket to closure asap
- Solve common problems such as username and passwords issues, menu navigation, verification of hardware and software, installation issues, setup/system requirements, and licensing.
- Document customer technical issues (FAQ support), solution from knowledge base
- Manage customer expectations regarding estimated response times for issue resolution.
- Meet SLAs like response and resolution times by partnering within L1, & L2 Support groups.

Required Skills

- Excellent customer service orientation
- Passion to be a part of a hardworking and winning team
- Ability to multitask in a fast paced environment
- Good debugging skills
- Excellent ability to learn and articulate software-related and technical concepts
- Strong active listening skills and excellent written and oral communications skills
- Strong attention to detail when communicating with customers (verbal & written)
- Ability to empathize with customers and convey confidence
- Strong documentation skills

Desirable Skills

- Working knowledge of web applications and related technologies
- Networking technologies

Educational Qualification:
B.e / B.tech, Mca, M.sc. (It), B.sc. (Cs) Or Equivalent

Manager Technical Support : 4 To 8 Years Of Experience

The Primary Goal Of This Position Is To Help Veryx Customers Achieve Success Using Our Solutions. Candidate Will Be Responsible To Lead A Technical Support Team For Providing High-Quality Technical Support Of Veryx Products Through Email, Phone Interactions, Chats, Desktop Sharing With Customers. Relevant Experience In Technical Customer Support (Voice And Email), With A Strong Customer Interaction Experience Will Be Needed.

The Position Involves Handling And Resolving Complex Technical And Functional Queries From Customers. Candidate Should Be Willing To Work In A Flexible Time Zone And Provide Weekend

Coverage, If Needed.

Responsibilities

- Help resolve software and technical questions for the customer efficiently and effectively
- Gather the required information necessary in order to best handle customer software and technical inquiries
- Manage customer expectations regarding estimated response times for issue resolution.
- Resolving the issues through Phone, chat and email communication channels.
- Meet SLAs like response and resolution times by partnering within L2 Support groups.
- Extensively research and document customer technical issues.
- Collaborate with technical support team members to properly manage customer inquiries and escalate when appropriate.
- Own customer technical issues from initial report to resolution, communicating with customers regularly regarding issue status.
- Run monitoring reports for usage, performance, and/or availability.
- Management and mentoring of the support team
- Document solutions for knowledge-base and bring new ideas for innovation and automation excellence

Required Skills

- Excellent Customer Service Orientation
- Passion to be a part of a hardworking and winning team
- Good debugging skills
- Willing to work in a flexible time zone and provide weekend coverage, if needed.
- Ability to multitask in a fast paced environment
- Excellent ability to learn and articulate software-related and technical concepts
- Strong active listening skills and excellent written and oral communications skills
- Strong attention to detail when communicating with customers (English – verbal & written, Hindi – verbal preferable)
- Ability to empathize with customers and convey confidence
- Strong documentation skills

Desirable Skills

- Working knowledge of web applications and related technologies
- Networking technologies

Educational Qualification:

B.e / B.tech, Mca, Msc – It Or Equivalent

Test Lead – Voip: 4 To 6 Years Of Experience

We Are Looking For A Candidate Who Has Hands-On Experience In Testing Of Voip Protocols And Strong Domain Knowledge In Voip. The Right Candidate Should Flexible And Capable To Guide A Small Team As Well As Be Able To Work As An Individual Contributor With Little Or No Guidance.

Responsibilities:

- Test suite development of SIP, SIPI, RTCP, M3UA, DTMF, Signalling over IP etc.
- Creation of test plans, test scripts and API creation.
- Creation of test bed
- Review of team members' deliverables.
- Tracking project schedule.

Required Skills:

- Experience in testing SIP, RTCP, DTMF, Signalling over IP.
- Experience working with open source Linux based software (SIP, RTCP, M3UA, DTMF etc).
- Experience in creating test plans.
- Debugging test failures.
- Knowledge and experience with protocol analysers such as Wireshark

Desirable Skills:

- Automation of test plans.
- Coding in Python and Tcl.

Professional Services

Telco Transformation

Sdn Developer : 2 To 6 Years Of Experience

We Are Looking For Sdn Developers Who Can Contribute To Telco Sdn-Based Projects Involving▢ Areas Such As Intent-Based Provisioning And Closed-Loop Automation For Service Lifecycle Orchestration, Service Provisioning And Service▢ Assurance.▢

Mandatory Skills

- Experience in Python and Java scripting languages
- Working experience in development of BluePlanet service templates and resource adapters
- Experience in VM/container orchestration - Dockers and Kubernetes
- Good knowledge in DevOps tools and Agile methodology
- Knowledge about networking applications and inventory system

Desirable Skills

- Knowledge in networking and with networking equipment

Educational Qualification:

- BE/B.Tech, MCA, MSc – IT

Apply Now

Mobile Technologies - 5G Core And Ran

5G Physical Layer (Phy) / L1 Developers : 2 To 8 Years Of Experience

We Are Looking For C Developers Who Can Contribute To The Development Of Physical Layer Features For 5G Ran, And Who Have Strong Understanding Of Wireless/Baseband Signal Processing Concepts.

Responsibilities Include:

- Layer-1 design and development using C

Required Skills:

- Previous experience with at least one OFDM-based commercial wireless technology (e.g., WiMAX, WiFi 802.11 a/b/g/n/ac/ax, LTE, 5G).
- Hands-on expertise in 4G/5G Layer-1 development on a GPP or DSP
- Proficiency in 4G/5G Layer-1 development and 3GPP specifications.
- Familiarity with L-PHY and radio fundamentals.
- Excellent communication skills

Desirable Skills:

- Experience with Intel FlexRAN
- Experience with test equipment such as VSA and VSG.
- Ability to analyze issues during radio integration.

Educational Qualification:

B.e / B.tech, Mca, Msc – It

[Apply Now](#)

Ui Developer - 5G Ems : 3 To 7 Years Of Experience

We Are Looking For Ui Developers Who Can Work Independently And Contribute To The Development Of High Performance Gui Applications For 5G Ems. Responsibilities Include:

- Preparation of Requirements, Design and Development of GUI for product releases
- Support in building Development/Test Environments.
- Performing reviews and ensuring quality before release
- Technical ownership of the complete GUI development end to end.

Required Skills:

- HTML , CSS (Cascading Style Sheets), JSON (JavaScript Object Notation), ReactJS/ Angular JS
- Knowledge in Networking
- Knowledge in NetConf/ ConfD
- REST APIs

Desirable Skills:

- Knowledge of Dockers, Kubernetes

Educational Qualification:

B.e / B.tech, Mca,Msc - It

[Apply Now](#)

Protocol Software (Lte/5G Development) : 1 To 5 Years Of Experience

We are looking for enthusiastic telecommunication professionals who can contribute for large scale 5G software development efforts based on Open-RAN for a globally leading mobile wireless company.
Responsibilities Include But Not Limited To

- Planning, estimation and enhancement of xApps based on O-RAN
- Guiding team members for development
- Reviewing the team members work.

Mandatory Skills:

- Experience in C, C++ programming
- Experience in eNodeB/gNodeB software development, validation, maintenance and lifecycle
- Detailed understanding of 3GPP specifications
- Expertise in PDCP, RRC, GTP protocols
- Experience in container/micro-services development
- Deep insight of Unix like operating systems
- Familiarity with 4G-LTE/5G

Educational Qualification:

- Bachelors or Masters in Engineering (B.E/B.Tech or M.E/M.Tech) in Computer science or Electronics and Communication

Apply Now

4G/ Lte/ 5G Testing Engineers : 3 To 8 Years Of Experience

We Are Looking For Enthusiastic Telecommunication Professionals Who Can Contribute For Large Scale 5G Software Development Efforts Based On Open-Ran For A Globally Leading Mobile Wireless Company.

Responsibilities:

- Development of test strategy and test plans

Mandatory Skills:

- Experience in protocols like RRC, MAC, PDCP, RLC, SDAP, eCPRI etc.
- Experience in eNodeB testing
- Experience in 4G/ 5G call processing testing
- Knowledge in use of Vector Signal Analyser and Vector Signal Generator
- Experience in Fronthaul testing for performance testing, conformance testing, interoperability testing, automated testing.

Secondary Skills:

- Exposure to protocol such as E1AP,F1AP, NGAP, XnAP
- Knowledge of 5G protocols.

Educational Qualification:

- Bachelors or Masters in Engineering (B.E/B.Tech or M.E/M.Tech) in Computer science or Electronics and Communication

Back End Developer- Python : 5 To 8 Years

We Are Looking For Python-Based Backend Developers Who Can Work Independently

Responsibilities Include:

- Writing reusable code for the specific modules of EMS
- Designing and creating RESTful APIs
- Debugging code on the platform to find the root cause of any ongoing issues and rectifying them

Required Skills:

- Python, REST/ Open API

Desirable Skills:

- Docker, Kubernetes

Educational Qualification:
B.e / B.tech, Mca, Msc – It Or Equivalent

Ip Networking - Development

Protocol Developers : 1 To 5 Years Of Experience

We are looking for dedicated and talented Network Protocol stack developers for developing firmware for a Layer 2/ Layer 3 Switch. Strong L2 switching and routing protocols is a must.
Mandatory Skills:

- Experience in C Programming
- Linux/Unix system calls
- State Machine implementation

- Multithreading, memory management
- IPC: shared memory, message queues
- SNMP protocol, SNMP commands, Traps
- Have worked on Layer 2 or Layer 3 protocols such as RSTP, VLAN and OSPF
- Knowledge of tools: gdb, Cunit, Coverity, Gcov, Gprof, Valgrind, Net-SNMP

Educational Qualification:

- BE/B.Tech, ME/M.Tech, MCA, MSc – IT

Apply Now

Ui Developer – Datacom Switch : 1 To 5 Years Of Experience

We are looking for UI developers who can work independently and contribute to the development GUI applications on network switches.

Responsibilities Include:

- Preparation of Requirements, Design and Development of GUI for product releases
- Support in building Development/Test Environments.
- Performing reviews and ensuring quality before release
- Technical ownership of the complete GUI development end to end.

Required Skills:

- Strong in Javascript, CSS, HTML, Jquery
- Illustrate design ideas using storyboards, process flows and sitemaps.
- Design graphic user interface elements, like menus, tabs and widgets and build page navigation buttons and search fields.
- Develop UI mock-ups and prototypes and create original graphic designs (e.g. images, sketches and tables).
- Identify and troubleshoot UX problems (e.g., responsiveness).

Desirable Skills:

- Knowledge in Networking
- Good knowledge of SNMP

Educational Qualification:

- B.E / B.Tech, MCA,MSc – IT

Apply Now

Cyber Security

Security Analyst : 4 To 6 Years Of Experience

We are looking for candidate who can perform the following:

- Perform Penetration and Vulnerability Test
- Perform Security assessment
- Perform automation test
- Recognize and safely utilize attacker tools, tactics, and procedures
- Develop scripts, tools, or methodologies

Required Skills And Experience:

- Good Knowledge and Experience working in Python
- Experience in powershell scripts in Windows
- Experience in bashshell in Linux
- Experience in performing penetration and vulnerability application test.

Desirable Skills:

- Knowledge of Caldera tools

The Ideal Candidate Should:

- Be confident & assertive with high energy levels.
- Be technical independent with good problem solving & analytical skills
- Have Good verbal and written communications skills

Educational Qualifications:

- BE/B.Tech, MCA, MSc – IT

Apply Now

Network Security Engineer : 5 To 8 Years Of Experience

Our Client Is An Industry Leader In Providing Communication Solutions, Looking To Onboard A Network

Security Engineer.

The Network Security Engineer Would Help In Enhancing Design, Develop And Test Security Posture For Data Communication Networks (Dcn) Over Internet, Enabling Secure Connection Between Enterprise Deployments In Multiple Locations.

Initially, The Network Security Engineer Has To Help With Capturing Secure Data Communication Networks Design That Meets The Customer Requirements And Security Best Practices. Post Design, The Engineer Would Need To Help In Deployment, Configuration Of Devices, Testing The Deployment And Support In Suitable Internal Security (Vapt) Testing.

Mandatory Skills:

- Network Security Administration – handling of Firewalls – rules, network segmentation, user access management.
- Knowledge of Syslogs (Linux), Event Management (Windows), and usage of relevant tools (syslog-ng)
- Work experience on network monitoring tools (syslog-ng, Nagios, Zimbra)
- Linux Tools, Linux environment experience and working knowledge for open-source security tools – MUST
- Necessary scripting expertise Python, Java Scripting, Windows command Shell, Unix Shell, PowerShell expertise - MUST
- Basic exposure to working with GIT/Development

Educational Qualification:

B.e/B.tech, Me/M.tech, Mca, Msc – It Or Equivalent

Cloud And Multi-Cloud

Cloud Network Developers: 5 To 7 Years Of Experience

We are looking for developers who can work independently to develop networking software for cloud environments.

Required Skills:

- Routing, IP & Domain management, IPSec, VPN, Multi-Cloud
- Data plane & control plane implementation
- Cloud native environments
- Network programming, scripting

- C/C++ programming

Educational Qualifications:
B.e / B.tech, Mca,Msc – It

Senior Cloud & Devops Engineers: 4 To 6 Years Of Experience

We are looking for DevOps engineers who can develop automation for cloud environments.
Required Skills:

- Experience in one or more public cloud environments AWS, Azure, Google Cloud
- Kubernetes, cloud Networking, Security & Storage, Docker, Helm
- Opensource cloud & on-premises technologies
- Familiarity with ONAP orchestration and automation will be an advantage.
- Linux & scripting

Educational Qualifications:
B.e / B.tech, Mca,Msc – It

Applications

.Net Developers : 3 To 8 Years Of Experience

We Are Looking For .Net Developers Who Can Work Independently And Contribute To The Development And Maintenance Of Business Critical Applications:

- Design, develop, and maintain applications using .NET Core, ASP.NET, MVC, C#, and the .NET Framework.
- Work with Entity Framework for database operations and ensure optimal performance.
- Develop RESTful APIs and integrate third-party APIs.
- Work with Azure services to deploy, manage, and scale applications.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Stay updated with the latest industry trends in the .NET technologies to ensure applications are current and competitive.
- Strong understanding of object-oriented programming.
- Familiar with various design and architectural patterns.

Required Skills:

- .NET Core 6 and above
- Entity Framework
- ASP.NET
- MVC
- C#
- Azure
- REST
- JavaScript
- HTML5 & CSS3
- Git
- Agile methodologies
- 3rd Party SDKs
- Communication
- Microservices
- SQL Server

Desirable Skills:

- Azure DevOps
- GraphQL
- NUnit or xUnit
- OWASP

Educational Qualifications:

B.e / B.tech, Mca,Msc – It

[Apply Now](#)

Senior Developer : 4 To 6 Years Of Experience

We are looking for development engineers to develop applications in cloud environments.

Required Skills:

- HTML, CSS, jQuery
- Java, C/C++, Kotlin, Go, Python programming

Educational Qualifications:

B.e / B.tech, Mca,Msc – It
