

Net-O2 showcases SwitchTester™ at INTEROP, Las Vegas, May 22-24

Description

Chennai, May 02, 2007 -- Net-O2 Technologies Is Showcasing Its Next Generation Product - Net-O2 Attest Switchtestertm. Visit Us At Booth #1782 At The Interop, Las Vegas, May 22-24 For A Demo Of The Switchtester.

Net-O2 Attest Switchtester Is A Feature-Rich Automated Software Testing Solution For Comprehensive Functional Verification Of Layer 2 And Layer 3 Protocols In Fast Ethernet And Gigabit Ethernet Switches. Through A Built-In Database Of Ready-To-Run Test Cases Using Typical Deployment Scenarios, Switchtester Provides Developers And Testers The Ability To Emulate And Automatically Verify The Switch Functionality.

As The Ethernet Switching Market Is Highly Competitive, Equipment Manufacturers Are Faced With Increasing Pressure To Deliver Feature-Rich Products At Lower Price Per Port. Typical Testing Solutions Available In The Market Do Not Provide Such A High Level Of Ready Automation Capability For Easy Verification Of Protocol Functionality In Switches. The Product Would Greatly Benefit Developers And Test Engineers Implementing Switching Solutions For Enterprise, Edge, Metro, Storage And Industrial Applications.
