IT Monitoring Solutions for Retail Industries

It Monitoring Solutions For Retail Industries

Retail Companies Have Been Aggressively Pursuing Digital Transformation Adopting New Technologies Such As Data Analytics, Cloud And Real-Time Multimedia Communications. In The Post-Covid Scenario, Many Retailers Have Realized That Customer Expectations Are Limitless, As They Look Forward To Shopping Experiences Both As Online And Brick-And-Mortar Formats. They Need To Ensure The Health And Performance Of Their It Infrastructure To Ensure Customers, Warehousing And Supply Chains Which Are Geographically Dispersed And Remote Are All Well Integrated.

It Teams Need To Get Sufficient Visibility And Telemetry To Ensure That Their Infrastructure And Applications Are Available And Performing Well To The Satisfaction Of Their Users, Partners And Customers.

Top Challenges Faced By Retail Companies

Effectiveness Of Current It Infrastructure

Next Generation Applications Increasingly Demand More Computing, Memory And Storage Along With Better Connectivity.

Availability Of Time Critical Applications

Connectivity To Distributed Locations For Time Critical Applications Need To Be Closely Monitored.

Increasing Capacity And Demand

Ineffective Tracking Of Capacity Utilization And Planning For Demand Could Result In Breakdowns And Poor Performance.

Support For Remote And Dispersed Sites

Enabling Consistent Digital Experience For Collaboration Regardless Of Location, Device Type, Connectivity Etc.

Increased Threats From Remote Workers Devices

It Resources Without Latest Security Patches Access From Less Secure Environments Can Prove Risky.

Limitations Of Existing Tools

Multiple Vendor Specific Monitoring Systems And Legacy Tools Not Sufficiently Upto The Task.

Veryx Cloudmon Enables Retail Companies To Overcome Challenges Related To It Infrastructure, Network And Application Performance:

Challenge

Veryx Cloudmon visibility solution

Effectiveness of IT infrastructure

Time critical applications

Capacity and demand

Remote site support

Threats from compromised resources

Limitations of existing toolsets

Provides timely intelligent alerts for potential problems

Supports monitoring at high granularity for critical applications

Provides reporting on utilization levels

Supports monitoring of remote devices for quick trouble-shooting

Provides visibility of threats from the network

Consolidates and provides a unified view of servers, networks and end-points

Unified Visualization

Easily Administer It Infrastructure To Resolve Issues.

Deep Visibility

Resolve Network Performance Problems With High Visibility

Affordable, Cloud-Based

Available For Both On-Premise And Cloud In Pay As You Go Model

Cloudmon For Enterprises

[Cloudmon Itim](#)

It Infrastructure Monitoring

- Monitor servers, VMs, networks and user devices.
- Monitor VMs and VPCs in public cloud.
- Monitor networks and WAN end-points.
- Monitor remote user devices.
- Monitor business-critical applications for availability.
