

Veryx joins Overture's Harmony Ecosystem to accelerate NFV adoption for network service providers

Description

An Open And Multi-Vendor Ecosystem Will Enable Communication Service Providers To Realize Seamless Transition To Nfv.

Fremont, Ca, Us Veryx Technologies, A Leading Provider Of Innovative Test And Measurement Solutions, Today Announced That It Has Joined Overture's Partner Ecosystem – Harmony. Harmony Is A Consortium Of Hardware, Software And Services Partners Focused On Allowing Communication Service Providers To Select Best Of Breed Components And Avoid Single Vendor Proprietary Systems, While Accelerating Nfv Deployments And Minimizing Project Risks.

“We Are Pleased To Welcome Veryx Into The Harmony Partner Ecosystem, Said Houck Reed, Overture Vice President Of Product Management And Customer Service. “Innovative Companies Like Veryx Bring Great Value To The Nfv Movement. Products Like Samtest Provide The Virtualized Functionality That Will Be Vital To Csps As They Transition Their Hardware-Based Networks To A Virtualized Service Delivery Environment”, He Added.

“Veryx Is Excited To Join Overture's Harmony Ecosystem, For Enabling Service Providers To Track Key Performance Indicators (Kpis) And Diagnose Bottlenecks While Ensuring Sla Commitments In Virtualized Environments”, Said David Charlu, Ceo Of Veryx Technologies. “By Utilizing Samtest In An Open And Multi-Vendor Ecosystem Such As Harmony, Communication Service Provider (Csp) Customers Will Be Able To Guarantee Service Levels When They Transition To Nfv. We Look Forward To Working With Overture In Helping Csps Deliver Better Service Levels With Nfv”, He Added.

Veryx Samtest Provides An Ideal Solution For Csps To Perform On-Demand Measurement And Monitoring Of Kpis, Thereby Enabling Quick Diagnoses Of Virtualized Network Services Based On Nfv Technology. Samtest Provides Csps The Capability For Generation Of Analytics And Reporting, Thereby Enhancing Sla Compliance And Customer Experience.
