

Veryx Technologies launches SDN Controller Tester

Description

Veryx Technologies Launches Sdn Controller Tester

Real-World Network Emulation For Benchmarking Sdn Controllers

Philadelphia, Pa, January 20, 2014 - Veryx Technologies Has Launched Pktblaster Sdn Controller Test - A Software-Based Test Solution For Performance Benchmarking Of Sdn Controllers And Applications. It Is An Integrated Test Solution That Emulates A Real-World Sdn Network Consisting Of Both The Orchestration And Network Infrastructure Layers, In A Single Box.

As Cloud Service Providers And Data Centers Across The Globe Plan The Transition To Sdn-Based Architectures, There Is A Need For Scalable, Automated Tools Which Can Be Easily Deployed. Thus, Veryx Pktblaster Sdn Controller Test Solution Provides An Ideal Tool For Benchmarking Controllers, Proof-Of-Concept Studies, Prototyping And Acceptance Testing." Said David Charlu, Ceo Of Veryx Technologies. "Being Software-Based Makes It A Very Attractive Proposition", He Added.

Pktblaster Sdn Controller Test Is A Software-Based Solution That Can Run On Veryx Hardware Or Any Commodity Hardware, And Can Emulate Thousands Of Nodes, Significantly Reducing The Need For Large Scale Physical Network Infrastructure Or Expensive Hardware For Testing And Benchmarking Sdn Controllers.

Pktblaster Sdn Controller Test Enables Verification Of Sdn Functionalities Including Controller Southbound And Northbound Communication, Resiliency, Handling Network Failures, Performance And Scalability.

About Veryx Technologies

Veryx Technologies (www.veryxtech.com) Is An Innovative Enterprise Providing Solutions That Enable Companies Significantly Reduce Their Testing Related Investments, While Simultaneously Enhancing The Product Quality And Efficiency Of Testing. Veryx Offers Flexible Cost-Effective Products, Solutions And Services For Testing Applications In Access, Carrier Ethernet, Data Center, Edge, Enterprise, Industrial Networking, Network Virtualization, Software Defined Networking And Security.
