

WebNMS and Veryx to deliver multi-vendor Carrier Ethernet Service Orchestration solutions aligned with the MEF's Third Network vision

Description

Leading Network Management And Test Solutions Integrated To Deliver Agile And Assured Carrier Ethernet Services On Multi-Vendor Networks

- Integration extends automation to include active service validation and verification
- Partnership fuels orchestration of entire service lifecycle
- Visit WebNMS at Mobile World Congress in booth 5K21

Pleasanton, Calif. And Barcelona, Spain - Webnms, The Leading Provider Of Multi-Vendor Network Management And Iot Solutions, And Veryx Technologies, The Global Leader In Ce 2.0 Test And Measurement, Today Announced Their Partnership To Deliver Fully Automated Carrier Ethernet (Ce) Service Orchestration Solutions. Their Combined Solution Allows Service Providers To Automate And Unify Their Network Operations, And Offer Dynamic, High Quality Networking Services. Symphony Is Being Demonstrated In Webnms' Booth 5K21 At [Mobile World Congress](#), Running Today Through March 5 In Barcelona.

As Communication Service Providers Operate Large Networks Built On Equipment From Multiple Oems, They Need Solutions That Are Independent From Any Individual Device Vendor To Provide Them Operational Flexibility And Control Their Own Success. The Mef Has Facilitated This Multi-Vendor Model With Their Open Ce 2.0 Specifications. The Third Network Vision Of The Mef Builds Upon These Popular Specifications To Define Lifecycle Service Orchestration – A Set Of Best Practices And Specifications For Building Automated Service Management Systems To Lower Operating Costs And Make Service Offerings More Dynamic.

“Today, Turning-Up, Assuring And Troubleshooting Carrier Ethernet Services Is Often A Cumbersome Process And Even Negatively Impacts The End Customer's Experience,” Said Prabhu Ramachandran, Director Of Webnms. “Our Symphony Orchestration Platform Unifies Multi-Vendor Network Management And Provides Powerful Automation Tools. By Integrating With Veryx Samtest, We Have Extended Automation To Include Active Service Validation And Verification – Essential For Assured Network Services.”

“Carrier Ethernet Service Providers Are Leveraging Veryx Samtest To Ensure Ce 2.0 Network Integrity”, Said Madhan Panchaksharam, Director Of Product Management At Veryx Technologies. “Our Partnership With Webnms Will Now Help Them Orchestrate The Entire Service Lifecycle And Dynamically Create, Test, Deliver And Assure The Quality Of Their Carrier Ethernet 2.0 Services.”

The Symphony Orchestration Platform Unifies Orchestration Of Ce, Mpls, Sdn And Nfv Services On Multi-Vendor Networks. Based On Field-Proven, Carrier Scale Network Management Technology, Symphony Unifies And Automates Every Aspect Of Service Management, Including:

- inventory
- provisioning
- activation
- assurance

As An Experienced Leader In Multi-Vendor Networking Solutions, Webnms Has Bundled An Unmatched Library Of Oem Equipment Adapters And Integrations With Open Interfaces Such As Restful Apis Into Symphony.

Veryx Samtest Is A Fully Automated Testing And Monitoring Solution, Designed To Help Service Providers In All Stages Of Ce 2.0 Service Assurance, Including Service Activation Testing, Monitoring And Troubleshooting. The Samtest Service Assurance Solution Uses Distributed Test Probes, Managed By A Central Controller Engine That Orchestrates Test Probe Operation And Third Party Ethernet Demarcation Devices To Provide Comprehensive, Real-Time Service Visibility Service Providers Offering High Quality Services For Mission Critical Applications Leverage Samtest Sla Measurement That Delivers Nano-Second Accuracy And Continuous Performance Monitoring At Sub-Millisecond Intervals To Ensure Sla Compliance With The Utmost Precision.
